9. Notes

C VALUE DATES

Removal of:

4 The value date for direct debits agreement is the date of the debiting of customer's account – same as the date of payment.

Change in:

➤ Outgoing payment orders ~~(including direct debit orders)~~ confirmed in the banking system until 15.00 and processed through BISERA 6 system, as well payment orders confirmed in the banking system until 15.30 and processed through the RINGS system are executed with a value date on the same working day. Payment orders received later than the above-mentioned hours as well the payment orders via Internet Banking system on non-working day for the bank will be executed with a value date on the next working day for the Bank.

E OTHERS

Removal of the following text from p. 3:

For transfers in currency different from the ones in which the Bank maintains accounts, the Bank applies approximate exchange rate. The ordering party is notified that the correspondent bank makes an arbitrage and depending on the exchange rate it has applied, it is possible the account of the ordering party to be debited with additional amount. Due to the fact that the final charges amount will be known after the transfer execution, the Bank blocks the ordering party account with an amount equal to at least 10 percents of the transfer amount plus the Bank charges plus the charges of the correspondent banks.

Introduction of:

5. In the case of a transfer in a currency for which the bank has not announced an exchange rate in its financial center and on its website at: www.postbank.bg, the transfer is executed at the exchange rate announced by the European Central Bank (fixing) for the respective currency on the day of the transaction. The client declares that he is informed that the transfer is executed through a correspondent bank, according to the exchange rate of the euro against the respective currency, announced by the ECB on the day of the transfer processing. In the event of a difference between the obligation to the correspondent bank and the amount owed on the client's account, a balancing operation is performed, and the client's account is additionally debited/credited with the amount of the difference. The client declares that he is informed and gives his explicit consent to the balancing operation being performed on his account.

6. When returning the amount of a transfer ordered by a client, regardless of the reason for the return, in which the currency of the transfer is different from the currency of the account, currency conversion is performed at the bank's buying rate for the relevant day. All exchange rate differences in these cases are at the expense of the client.

7. The bank does not execute transfers in a currency for which it has not announced an exchange rate in its financial center or on its website or in a currency for which there is no announced exchange rate by the ECB (fixing).

8. A request for the return of a transfer made at the client's order does not guarantee the return of the transfer amount. A return can be performed only after obtaining consent from the recipient of the payment.

Renumbering the existing p. 5 and p. 6 as p. 9 and p. 10

10. Interest Rates bulletin for individuals
